Volume: 19-13

**RPW Associates, Inc** is pleased to announce that “*proSeal Wrap*” is now available to the modular industry. The new *proSeal* building wrap for modular enclosures is constructed from a woven fabric of high density polyethylene tapes and then coated on both sides with a white / silver coating of low density polyethylene providing a strong tear resistance and water resistant product. The proSeal Building wrap is 12’ wide and packaged in 62’ lengths for easy installation. Full Master roll are available upon special order. With over 60,000 ft<sup>2</sup> in stock we can ship your needs immediately.
