

PRP **proSeal**™

News Update

Date: Aug 2013

Volume: 21-13

Distribution: All

RPW Associates, Inc introduces L-Trim another new product to better serve the roofing industry.

L-Trim is a 10' extruded aluminum termination bar that is powdered coated for long term performance and endurance.

The new *L-Trim* is centered punched 6" (150mm) on center for easy installation.

The unique curved design provides improved securement of the proSeal C3 roofing membranes at the perimeters your building or curbs. The design of the *L-Trim* also allows for two (2) different installation methods whereas it can be installed on the perimeter of the building which will also act a drip edge or the same bar can be reversed and used on roof top curbs or wall terminations whereas the curved edge acts as a sealant edge stop. We also supply the necessary Hex head #9 fasteners to complete the installation.
